Know your power!

Know your fight!

The Architecture of Surveillance

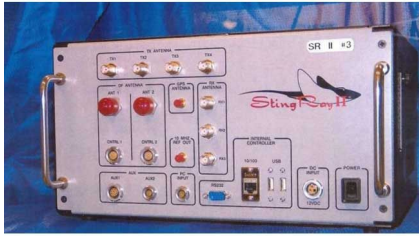

For details: <https://stoplapdspying.org/policing-strategies-and-tactics/>

Check out the photos of surveillance equipment on the back

Email: stoplapdspying@gmail.com www.stoplapdspying.org Ph: (424) 209-7450

Surveillance equipment used at community marches/actions (ex: May Day in LA)

Stingray: simultaneously devices that mimic cell phone towers and electronically fools nearby cell phones to send their signals into an LAPD computer

Freedom on the Move: Military-style mobile video surveillance system

DRT(Digital Receiver Technology)“Dirtboxes”
Military surveillance technology- can intercept data, calls & text messages from hundreds of cell phones simultaneously, & jam device transmissions

High definition cameras: LAPD uses these to stream video to a remote police command post & agile enough for a densely packed, large-crowd event

Trapwire: street camera style surveillance

Automatic license plate reader (ALPR):
High-speed cameras mounted on poles & patrol cars that record every passing vehicle's license plate, along with time, date and location

LRAD (Long Range Acoustic Device): Also known as a sound cannon

Body Cameras:
A 24/7 surveillance tool police officers wear on their bodies facing outward
